Software used in the project: -

Operating system: - Windows 11 Home  
Processor: - AMD Ryzen 5 5500U  
Language: - Java 1.8  
HTML: - 5  
CSS: - 3  
Spring: - 2.1.3  
Servlet: -4.0.1  
MySQL: -8  
Maven: - 2.5.2  
Hibernate: - 5.3.7  
Spring Tool Suite IDE Version: - Version: 4.15.3. RELEASE  
Microsoft word: - 2019 Home & Student

Objective: - This project has been created to develop a prototype of a website for sporty shoes. This prototype has a user interface for users where users can log in, find the products for their selves, update their profile, they can purchase products and check the order status.

I've done the above project as my best effort, but it took more time than the given duration. Used software while creating this project is mentioned above. Also, what we have done in this project as per the need of SportyShoes.com is mentioned above.

Please give your proper input for this project.  
Thank you so much.
